

DRIVE TO STORE AD | Mobile or Desktop is an In-Page ad. On click it directs to google maps and shows the nearby markers that are configured. In this sample the query is

<https://maps.google.com/?q=mcdonalds>

SCAN ME ON A MOBILE DEVICE:

When the markers are not available via a query please e-mail Adsolutions for an excel template in which coordinates and naming per marker can be added. The above sample with a query is the most elegant and preferred solution.
